

Karin Ljunggren

Frontend developer, Gothenburg

I love creating delightful and functional web solutions.
Strong focus on the user and I master various frontend skills from design to coding to make an optimal web experience..
I prefer working with React.js, Next.js, Vue.js , Headless CMS, but also WordPress custom themes.
Passionate also about UX/ UI and Accessibility.

Work Experience

Boozang Technologies INC – Frontend developer

2017 - current - part time, project based

Boozang SaaS, based in Montreal, is a tool that tests your web application flows end-to-end, using a low-code approach.

I have contributed to multiple projects, focusing on enhancing user experience and functionality. In each project, my work was centered on creating seamless, high-performance user interfaces, utilizing technologies like React.js, Vue.js, WordPress and SCSS/LESS.

- Designed and developed Boozang's homepage, improving user engagement.
- Refactored the admin interface of a legacy app for better usability.
- Led frontend refactoring of Boozang Management for enhanced accessibility.
- Developed TheLab, a training platform for the Boozang tool.
- Improved UX of the Boozang test tool to streamline user interactions.

Kungälv kommun – Hourly temp caregiver

Dec 2022 - current

Caregiver for older people and assistant for persons with disabilities. Adapting to varying needs allows me to contribute to improving clients' comfort and independence. Interim employment.

Knowit connectivity – Frontend developer

June 2021 - Dec 2021

Consultant as Frontend developer in Gothenburg. Implemented responsive, user-friendly admin interfaces using Vue.js and Vuetify, Vuex and SCSS.
